

Supplementary: cross-cohort replication filter, CPTAC power/HPV, and the single-cohort trap

Forest whiskers in (a) and (b): 95% CI of the hazard ratio; shaded bands in (c) and (d): 95% CI of the survival function

No. at risk (cumulative deaths)			
high	203 (0)	8 (90)	0 (95)
low	204 (0)	7 (108)	1 (109)

shaded bands: 95% CI

No. at risk (cumulative deaths)			
high	350 (0)	154 (58)	29 (69)
low	351 (0)	139 (85)	29 (113)

shaded bands: 95% CI
